## A Revolutionary Way to Restore Youth

Dramatically soften lines and wrinkles at home—without expensive injections. **University Medical Face Lift®** patches visibly reduce crow's feet, forehead wrinkles, and deep-set creases safely and gently.

### Reduce Wrinkles—No Appointment Necessary

Why spend time and money in the doctor's office when you can smooth lines at home?

**University Medical Face Lift®** patch systems use breakthrough micro-charged Ion-Power™ to safely deliver Syn-ake® peptide and Hyaluronic filler deep into the skin's surface. You'll see a dramatic smoothing effect that goes beyond ordinary wrinkle creams. It works fast, too. You'll see—results are visible within the first few days to 2 weeks, depending on the individual.

**Face Lift® WrinkleFree™ Brow Patch System** smooths, firms, and hydrates to reduce deep-set forehead wrinkles and creases that most creams can't treat.

*New and improved technology:*

**Face Lift® WrinkleFree™ Eye Patch System** visibly reduces hard-to-treat crow's feet and eye area wrinkles as well as dark circles and puffiness. It leaves the delicate eye area hydrated and smooth.

The new patches must be worn for one hour, once a week. The power light will let you know treatment is being actively delivered. Use the serum twice a day, at morning and night, to maintain your results.

Each kit contains 2 Ion-Power™ patch treatments and .025 fl oz. serum.

## Go Beyond Creams with the Latest Wrinkle Fighter

The next generation of age-defying technology has arrived. Safe, gentle, micro-charged Ion-Power™ wrinkle treatments are a revolutionary new way to help your skin look smooth and youthful.

Go Beyond Creams.

Micro-charged Ion-Power™ patches deliver treatments deeper and faster.

No cream or serum gets as deep into the skin's surface to firm and fill. Skin is left exceptionally smoother and younger looking.
